Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 16-26 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Analysis: Claims 16-26 recites computer-readable medium. However, Claims 16-26 is not limited to tangible embodiments. In view of applicant's disclosure, specification page 9, lines 3-16, the medium is not limited to tangible embodiments, instead being defined as including both tangible embodiments (e.g. non-volatile media such as optical or magnetic disk, volatile media such as dynamic memory, etc.) and intangible embodiments (e.g. transmission media such as acoustic or light waves). As such the claims are not limited to statutory subject matter and is therefore non-statutory.

Claim Rejections - 35 USC § 112

2. Claims 1-11, 16-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat.

App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 1, 11, 16 and 26, recites the broad recitation of "maintaining first copy and second copy of table at different sites", and the claim also recites "at least one non-overlapping relational database column at first copy and second copy, both before and after the updating" which is the narrower statement of the range/limitation. Specifically copy of table indicates same table without any difference.

Similarly claims 2, 3, 17, and 18, recites "non-overlapping database column is missing in one copy and present in second copy", where as claim 1 recites "non-overlapping column is present in both copy.

As per claims 4, 19, it recites "reconciling differences in column shape during updating" which indicates that data tables are exactly identical but claim 1, recites non-overlapping columns that indicates different shape.

As per claims 9-10, 24, 25, Claims 9 and 24, step a and b, maintains first copy of the table at first site with two columns, step c and d maintaining only second column at second site, step e, describing updating first site with second site by dropping first column and **adding second column to first site** (Note: first site already had second

column to begin with) However, This indicates first site and second site have same table with second column. Step f however, indicates that both table maintain different set of columns. This is indefinite.

Response to Arguments

3. Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.

In view of applicant's amendment previously recited art rejection is withdrawn.
